Gatekeeper

Artificial Intelligence & LuminIQ

WHAT YOU NEED TO KNOW

Gatekeeper's AI suite, LuminIQ, introduces a powerful digital workforce designed for Finance, Legal, and Procurement teams. It helps our customers reclaim time, reduce risk, and unlock measurable ROI — all within the secure Gatekeeper platform.

WHAT IS LUMIN IQ?

LuminIQ powers intelligent features like:

1. **Lumin Summary** - Automatic contract and clause summarisation
2. **Lumin Insights** - Smart recommendations and issue flagging
3. **Digital Workers** - Fully managed agents that automate high-friction tasks in Finance, Legal & Procurement

LuminIQ transforms routine work into strategic outcomes — helping your teams act faster, with more accuracy, and less manual overhead.

PLATFORM & MODEL STRATEGY

Lumin IQ runs on **AWS Bedrock**

It uses a **model-agnostic architecture**: Gatekeeper selects and operates the most suitable foundation models for each capability.

Model choices may change over time as quality and safety improve; **our data protection commitments do not**.

SECURE BY DESIGN

Data segregation — Tenant-level isolation and least-privilege access. Your data is not mixed with other customers'.

No training on your data — We do not use customer content (prompts, documents, outputs or metadata) to train or improve foundation models — whether ours or third-party.

SECURE BY DESIGN CONTINUED

Data sovereignty — Processing and storage remain in-region (EU, US, Canada, APAC) according to your tenancy and our Terms of Service.

Provider controls — When using third-party models via Bedrock, provider-side data retention and training are disabled.

Security — SOC 2 Type II & ISO 27001 controls; encryption in transit and at rest; audit logging.

SOC 2 Type II and ISO 27001 certified

HOW IT BENEFITS YOU

LuminIQ is designed to bring measurable improvements across your teams:

Department	Outcome Highlights
CFO	Margin protection, operational efficiency, reduced risk
Finance	Accurate compliance reviews, time saved on documentation
Procurement	Faster vendor onboarding, consistent ESG/InfoSec scoring
Legal	Automated contract analysis, reduced review cycles

You benefit from collective intelligence - **without compromising control or confidentiality.**
